

ce103_hw5_snake_dll.Class1.main

ce103_hw5_snake_app.Program.Main

ce103_hw5_snake_dll.Class1.exitYN

```
graph LR; A[ce103_hw5_snake_dll.Class1.main] --> C[ce103_hw5_snake_dll.Class1.exitYN]; B[ce103_hw5_snake_app.Program.Main] --> C;
```

The diagram illustrates a function call or dependency relationship. Two source functions, 'ce103_hw5_snake_dll.Class1.main' and 'ce103_hw5_snake_app.Program.Main', are shown on the left. Arrows from both point to a single target function, 'ce103_hw5_snake_dll.Class1.exitYN', which is highlighted with a gray background. The arrows are blue and point from the right side of the source boxes to the left side of the target box.
